We achieve rigorous manufacturing specifications with the use of post weld heat treatment, painting, galvanizing, radiological testing, and hydrostatic testing.

Workshop Activities:

We have our own WPS, PQR & Qualified class approved welders with in house training. We do all kind of fabrication work with timely delivery.

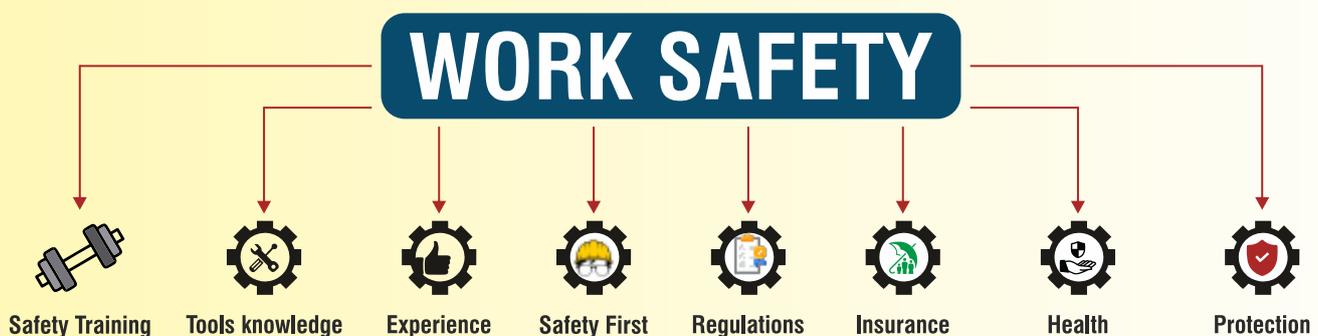

Ballast Water Treatment Systems (BWTS):

Ballast water is carried by ships to maintain stability and seaworthiness especially when it is not carrying cargo. It is estimated that 7000 species of plants, animals, and other organisms are transported every day in ballast water.

Scientific research has now proven that the discharge of ballast containing certain species can have a serious effect on the ecological balance of the environment in which the ballast is discharged. The introduction of foreign species can impact local biodiversity and ecological systems human health, and the local economy. This has been recognized by the IMO and the World Health Organisation. The ballast water and sediments carried by ships have been identified as a major pathway for transporting harmful invasive aquatic organisms and pathogens.

WORKERS STRENGTHS:

- ▶ Self-Development and Problem Solving Skills.
- ▶ High level of confidence and determination.
- ▶ Adopt ability to different environments and quick learning capabilities.
- ▶ Team work, Flexible, Punctual and Interest to Learn New Things.
